

## Project:

# Camanche Ground Water Supply Study

## Amador Water Agency Sutter Creek, California

The Camanche Ground Water Supply Study will be used to identify existing and future conditions that may influence the ground water basin. The study is funded through a California Department of Water Resources grant and Amador Water Agency funding. Investigation efforts are currently underway and will continue through the fall of 2011. On December 16, 2010 at 7:00 p.m. at the Lake Camanche Hunt Club at 2951 Curran Road, Dunn Environmental will be presenting an update to the ground water supply study during the Lake Camanche Village Home Owners Association Board Meeting. Please forward all questions, comments and additional information to the Amador Water Agency Engineering Department at (209) 257-5222.
